

City Region Postcode

## FEATURES

- It's support only Magento 2 version
- This extension allows the store admin to manage(add, edit, delete) regions & cities & postcode, convert text-input city and postcode field to the select dropdown in checkout address (shipping & billing) & customer address pages for both storefront and backend.

## Ultimate Guide for Magento 2 City Region Postcode

- Manage regions & cities & postcode easily via backend UI.
- Display city and postcode as a dropdown field with search option in the storefront (checkout shipping/billing address, customer address book).
- Display city and postcode as a dropdown field in the backend (customer edit address, edit order shipping/billing address & create new order shipping/billing address).

Experience the next level of City Region Postcode management with our feature-rich extension, meticulously tailored to meet the specific requirements and expectations of your Magento 2 platform. Elevate customer trust, engagement, and conversion rates seamlessly.

---

## How to install the extension

### 1. Install via composer (recommend)

- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **composer require mageinic/city-region-postcode**
- Run the command **php bin/magento module:enable MageINIC\_Core MageINIC\_CityRegionPostcode**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.

## 2. Upload via ZIP/Archive

- Back up your store's database and web directory
  - Download the extension zip file and extract the zip file
  - Transfer the **MagelNIC** folder to the Magento 2 **app/code/** directory on the server
  - Enable maintenance mode **php bin/magento maintenance:enable**
  - Run the command **php bin/magento module:enable MagelNIC\_Core MagelNIC\_CityRegionPostcode**
  - Run the command **php bin/magento setup:upgrade** to install the extension
  - Run the command **php bin/magento cache:clean** to clean the cache
  - Disable maintenance mode **php bin/magento maintenance:disable**
  - Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.
-

## Extension Usage

Once the Region & City & PostCode module functionality is enabled from the configuration showing option's

Manage Regions/Manage Cities/Manage Postcodes

The screenshot displays the MagelNIC admin dashboard. On the left, a sidebar menu lists various modules: DASHBOARD, MAGeNIC, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and THIRD PARTIES & EXTENSIONS. The 'MAGeNIC' module is expanded, showing sub-options: 'Manage Regions', 'Manage Cities', 'Manage Postcodes', and 'Manage Configuration'. The 'Manage Regions' option is highlighted with a red box. The main content area shows a 'Region & City & PostCode' header with a search icon, a bell icon, and a user profile icon labeled 'admin'. Below the header, there's a 'Reload Data' button. A section titled 'Go to Advanced Reporting' is visible. A chart area shows 'Revenue \$0.00', 'Tax \$0.00', 'Shipping \$0.00', and 'Quantity 0'. Below this, there are tabs for 'Bestsellers', 'Most Viewed Products', 'New Customers', and 'Customers'. A table lists items with columns 'Items' and 'Total', showing three entries with values of \$200.00, \$100.00, and \$100.00. Another table shows search results for 'Testing Product' with columns 'Search Term', 'Results', and 'Uses', showing one result with 1 result and 1 use. A final table shows 'Top Search Terms' with columns 'Search Term', 'Results', and 'Uses', also showing one result with 1 result and 1 use.

## Region Grid
